Section 2: Information to Contractors

1. Introduction

- 1.1 The Client named in the Data Sheet will select a Contractor from those listed in the Letter of Invitation, in accordance with the method of selection specified in the Data Sheet.
- 1.2 The Contractors are invited to submit a Technical Proposal and a financial proposal, or a Technical Proposal only, as specified in the Data Sheet for consulting services required for the assignment named in the Data Sheet. The proposal will be the basis for contract negotiations and ultimately for a signed contract with the selected firm.
- 1.3 The assignment shall be implemented in accordance with any phasing indicated in the Data Sheet. When the assignment includes several phases, the performance of the Contractor under each phase must be to the Client's satisfaction before work begins on the next phase.
- 1.4 The Contractors must familiarise themselves with local conditions and take them into account in preparing their proposals. To obtain first - hand information on the assignment and on the local conditions, Contractors are encouraged to visit the Client before submitting a proposal and to attend a pre-proposal conference if one is specified in the Data Sheet. Attending any specified pre-proposal conference is optional. The Contractors' representative should contact the officials named in the Data Sheet to arrange for their visit or to obtain additional information on any pre-proposal conference. Contractors should ensure that these officials are advised of the visit in adequate time to allow them to make appropriate arrangements.
- 1.5 African Union policy requires Contractors to provide professional, objective, and impartial advice, and at all times hold the Client's interests paramount, without any consideration for future work, and strictly avoid conflicts with other assignments or their own corporate interests. Contractors shall not be hired for any assignment that would be in conflict with their prior or current obligations to other clients, or that may place them in a position of not being able to carry out the assignment in the best interests of the Client.
 - 1.5.1 Without limitation on the generality of this rule, Contractors shall not be hired under the circumstances set forth below:
 - (a) *Conflict between consulting activities and procurement of goods, works or services: A firm that has been engaged to provide goods, works, or services for a project, and each of its affiliates, shall be disqualified from providing consulting services related to those goods, works or services. providing goods, works or services resulting from or directly related to the firm's consulting services for such preparation or implementation (other than a continuation of the firms earlier consulting services for the same project).

(b) Conflict among consulting assignments: Neither Contractors (including their personnel and sub-Contractors) nor any of their affiliates shall be hired for any assignment that, by its nature, may be in conflict with another assignment of the Contractors.

(c) Relationship with AUC staff: Contractors (including their personnel and sub-Contractors) that have a business or family relationship with a member of AUC staff (or of the Client staff, or of a beneficiary of the assignment) who are directly or indirectly involved in any part of: (i) the preparation of the TOR of the contract, (ii) the selection process for such contract, or (iii) supervision of such contract may not be awarded a contract.

- (viii) Any additional information requested in the Data Sheet.

3.5 The Technical Proposal shall not include any financial information.

Financial Proposal

3.6 In preparing the Financial Proposal, Contractors are expected to take into account the requirements and conditions outlined in the RFP documents. The Financial Proposal should follow the Standard Forms in Section 5. These list all costs associated with

the assignment, including (a) remuneration for staff, (foreign and local, in the field and at headquarters); and (b) reimbursable expenses such as subsistence (per diem, housing), transportation (international and local, for mobilisation and demobilisation), services and equipment (vehicles, office equipment, furniture, and supplies), office rent, insurance, printing of documents, surveys, and training, if it is a major component of the assignment. Where appropriate, these costs should be broken down by activity, and, if appropriate, into foreign and local expenditures.

- 3.7 The Financial Proposal shall include all the costs the Contractor incurs to provide the services (including travel expenses, translation, printing and the taxes the Contractor pays for its business requirements by the law of the domicile country of the Contractor), but shall exclude all local taxes levied within African Union Member States on the invoice issued by the Contractor (such as local sales tax, services tax or withholding tax).
- 3.8 Contractors may express the price of their services in any freely convertible currency. The Contractors may not use more than three foreign currencies. The Client may require Contractors to state the portion of their price representing local costs in the Currency of the Country specified for performance of the Services if so indicated in the Data Sheet.
- 3.9 Commissions and gratuities, if any, paid or to be paid by Contractors and related to the assignment will be listed in the Financial Proposal submission form (Section 5A).
- 3.10 The Data Sheet indicates how long the proposals must remain valid after the submission date. During this period, the Contractor is expected to keep available the professional staff proposed for the assignment. The Client will make its best effort to complete negotiations within this period. If the Client wishes to extend the validity period of the proposals, the Contractors who do not agree have the right not to extend the validity of their proposals.

4. Submission, Receipt, and Opening of Proposals

- 4.1 The original proposal (Technical Proposal and, if required, Financial Proposal; see paragraph 1.2) shall be prepared in indelible ink. It shall contain no interlineations or overwriting, except as necessary to correct errors made by the firm itself. Any such corrections must be initialled by the persons or person signing the proposal.
- 4.2 An authorised representative of the firm initials all pages of the proposal. The representative's authorisation is confirmed by a written power of attorney accompanying the proposal.
- 4.3 For each proposal, the Contractors shall prepare the number of copies indicated in the Data Sheet. Each Technical Proposal and

Financial Proposal shall be marked “Original” or “Copy” as appropriate. If there are any discrepancies between the original and the copies of the proposal, the original will govern.

- 4.4 The original and all copies of the Technical Proposal shall be placed in a sealed envelope clearly marked “Technical Proposal,” and the original and all copies of the Financial Proposal in a sealed envelope clearly marked “Financial Proposal” and warning: “Do Not Open with the Technical Proposal.” Both envelopes shall be placed into an outer envelope and sealed. This outer envelope shall bear the submission address and other information indicated in the Data Sheet and be clearly marked, “Do Not Open, Except in Presence of the Tender Opening Committee.”
- 4.5 The completed Technical and Financial Proposals must be delivered at the submission address on or before the time and date stated in the Data Sheet. Any proposal received after the closing time for submission of proposals shall be returned unopened.
- 4.6 After the deadline for submission of proposals, the Technical Proposal shall be opened immediately by the Bid Opening Committee. The Financial Proposal shall remain sealed and retained securely until all submitted proposals are opened publicly.
- 4.7 The Firm may withdraw its Proposal after the Proposal’s submission, provided that the written notice of the withdrawal is received by the Client prior to the deadline prescribed for submission of Proposals. The Firms’ withdrawal notice shall be prepared, sealed, marked, and dispatched in accordance with the provisions of clause Deadline for Submission of Proposals. The withdrawal notice may also be sent by telex or fax but followed by a signed confirmation copy. No Proposal may be modified subsequent to the deadline for submission of proposals. No Proposal may be withdrawn in the Interval between the deadline for submission of proposals and the expiration of the period of proposal validity specified by the firm on the Proposal Submission Form.

5. Proposal Evaluation General

- 5.1 From the time the bids are opened to the time the contract is awarded, if any Contractor wishes to contact the Client on any matter related to its proposal, it should do so in writing at the address indicated in the Data Sheet. Any effort by the firm to influence the Client in proposal evaluation, proposal comparison or contract award decisions may result in the rejection of the Contractor’s proposal.
- 5.2 Evaluators of Technical Proposals shall have no access to the Financial Proposals until the technical evaluation is completed.

-
- Evaluation of Technical Proposals**
- 5.3 The evaluation committee appointed by the Client, as a whole, and each of its members individually, will evaluate the proposals on the basis of their responsiveness to the Terms of Reference, applying the evaluation criteria, sub-criteria (typically not more than three per criteria), and point system specified in the Data Sheet. Each responsive proposal will be given a technical score (St). A proposal shall be rejected if it does not respond to important aspects of the Terms of Reference or if it fails to achieve the minimum technical score indicated in the Data Sheet.
- 5.4 In the case of Quality-Based Selection, Selection Based on Contractor's Qualifications, and Single-Source Selection, the highest ranked firm, or the firm selected on a single-source basis, is invited to negotiate a contract on the basis of the Technical Proposal and the Financial Proposal submitted in accordance with the instructions given in paragraph 1.2 and the Data Sheet.
- Public Opening and Evaluation of Financial Proposals: Ranking (QCBS, Fixed-Budget, and Least-Cost Selection Methods Only)**
- 5.5 After the evaluation of technical quality is completed, the Client shall notify those Contractors whose proposals did not meet the minimum qualifying score or were considered non-responsive to the RFP and Terms of Reference, indicating that their Financial Proposals will be returned unopened after completing the selection process. The Client shall simultaneously notify the Contractors that have secured the minimum qualifying score, indicating the date and time set for opening the Financial Proposals. The opening date shall not be sooner than one week after the notification date. The notification may be sent by registered letter, facsimile, or electronic mail.
- 5.6 The Financial Proposals shall be opened publicly in the presence of the Contractors' representatives who choose to attend. The name of the Contractor, the technical scores, and the proposed prices shall be read aloud and recorded as the Financial Proposals are opened. The Client shall prepare minutes of the public opening.
- 5.7 The evaluation committee will determine whether the Financial Proposals are complete (i.e., whether they have cost all items of the corresponding Technical Proposals; if not, the Client will cost them and add their cost to the initial price), correct any computational errors, and convert prices in various currencies to the single currency specified in the Data Sheet. The official selling rates used, provided by the source indicated in the Data Sheet, will be those in effect on the date indicated in the Data Sheet. The evaluation shall exclude those taxes, duties, fees, levies, and other charges imposed that are subject to the African Union exemption on the payment of taxes and duties, and estimated as per paragraph 3.7.
- 5.8 In case of **QCBS**, the lowest priced Financial Proposal (Fm) will be given a financial score (Sf) of 100 points. The financial scores (Sf) of the other Financial Proposals will be computed as

indicated in the Data Sheet. Proposals will be ranked according to their combined technical (*St*) and financial (*Sf*) scores using the weights (T = the weighting for the Technical Proposal; P = the weighting for the Financial Proposal as indicated in the Data Sheet. T + P = 1); The firm achieving the highest combined technical and financial score using the formula below would be invited for negotiations

$$S = St \times T\% + Sf \times P\%$$

- 5.9. In the case of Fixed-Budget Selection, the Client will select the firm that submitted the highest ranked Technical Proposal within the indicated budget price. Proposals that exceed the indicated budget will be rejected. In the case of the Least-Cost Selection, the Client will select the lowest evaluated cost proposal among those that passed the minimum technical score. The selected firm will be invited for negotiations.

6. Negotiations

- 6.1 Negotiations will be held at the address indicated in the Data Sheet. The aim is to reach agreement on all points and sign a contract.
- 6.2 Negotiations will include a discussion of the Technical Proposal, the proposed methodology (work-plan), staffing, and any suggestions made by the firm to improve the Terms of Reference. The Client and firm will then agree final Terms of Reference, staffing, and bar charts indicating activities, staff, periods in the field and in the home office, staff-months, logistics, and reporting. The agreed work plan and final Terms of Reference will then be incorporated in the “Description of Services” and form part of the contract. Special attention will be paid to getting the most the firm can offer within the available budget and to clearly defining the inputs required from the Client to ensure satisfactory implementation of the assignment.
- 6.3 Financial negotiations will reflect agreed technical modifications in the cost of the services, and will include a clarification of the firm’s tax liability (if any) in the Country specified for performance of the Services, and the manner in which it will be reflected in the contract. The financial negotiations will not normally involve either the remuneration rates for staff (no breakdown of fees), or other proposed unit rates under QCBS, Fixed-Budget Selection, or the Least-Cost Selection methods. For other methods of selection, an Appendix will be provided for the firm to explain the required information on remuneration rates.
- 6.4 Having selected the firm on the basis including an evaluation of proposed key professional staff, the Client expects to negotiate a contract on the basis of the experts named in the proposal. Before contract negotiations, the Client will require assurances that the proposed experts will be actually available. The Client will not consider substitutions during contract negotiations unless both parties agree that undue delay in the selection

process makes such substitution unavoidable or that such changes are critical to meet the objectives of the assignment. If this is not the case and if it is established that key staff were offered in the proposal without confirming their availability, the firm may be disqualified.

6.5 The negotiations will conclude with a review of the draft form of the contract. On completion of negotiations, the Client and the firm will initial the agreed contract. If negotiations fail, the Client will invite the firm whose proposal received the second highest score to negotiate a Contract.

7. Award of Contract

7.1 The contract will be awarded following negotiations. After negotiations are completed, the Client will promptly notify other Contractors on the shortlist that they were unsuccessful and return the unopened Financial Proposals of those Contractors who did not pass the technical evaluation (paragraph 5.3).

7.2 The firm is expected to commence the assignment on the date and at the location specified in the Data Sheet.

8. Confidentiality

8.1 Information relating to the evaluation of proposals and recommendations concerning awards shall not be disclosed to the Contractors who submitted the proposals or to other persons not officially concerned with the process, until the winning firm has been notified that it has been awarded the contract.

Section 4: Terms of Reference / Scope of Work

Maintenance and repair of the MESA/PUMA-2015 receiving ground stations

Background

The African Union, established as a unique Pan African continental body, is charged with spearheading Africa's rapid integration and sustainable development by promoting unity, solidarity, cohesion and cooperation among the peoples of Africa and African States as well as developing a new partnership worldwide. Its Headquarters is located in Addis Ababa, capital city of Ethiopia.

The Global Monitoring for Environment and Security and Africa (GMES & Africa)⁶ Support Programme is the crystallization of the longstanding cooperation between Africa and Europe in space science & technology, which is one of the key priorities of the long-term EU-Africa Joint Strategy. The GMES and Africa Support Programme aims to improve the capacities of African policy-makers, planners, scientists, businesses, the private sector and general public to design, implement and monitor national, regional and continental policies, and to promote sustainable management of natural resources through the use of Earth Observation data and derived information.³

The Programme is built on the achievements of predecessor Earth Observation Programmes in Africa. These include the Monitoring for Environment and Security in Africa (MESA), African Management of the Environment for Sustainable Development (AMESD) and Preparation for the use of Meteosat Second Generation in Africa (PUMA).

Under GMES&AFRICA Support Programme, AUC coordinates and oversees the maintenance of 188 existing PUMA2015 and MESA stations (cf. Table 1 Ground stations architecture overview and locations below) for EUMETCast⁷ Africa C-Band data flows acquisition, visualization and processing.

GROUND STATIONS ARCHITECTURE OVERVIEW

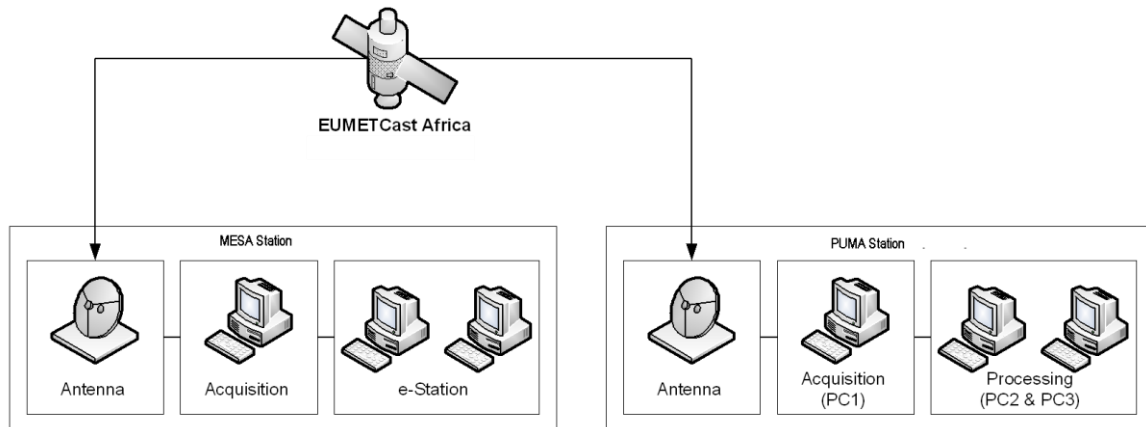

Figure 1: MESA Station (left) and PUMA-2015 (right) Architecture Overview

The ground stations are composed of the following equipment:

- **Outdoor unit** composed of 1 antenna subsystem (dish, mounting, feed, LNB, cables and possibly RF filter) to allow the reception of the EUMETCast DVB-S2 downlink in C-Band.
- **Indoor Units** each composed of the following elements:
 - 1 Acquisition subsystem consisting of a PC (PC1) equipped with a DVB-S2 reception card for EUMETCast data flow reception, one EUMETCast Key Unit (EKU) for decryption of data keys, and the TELLICAST software allowing frames decoding and reconstruction of files.
 - Archiving, Visualization and Data processing equipment and software(s):
 - **MESA station:** 1 workstation for data processing (PC2) and 1 workstation for satellite data archiving and visualization (PC3). The eStation software suite is installed on these two workstations.
 - **PUMA-2015 station:** Processing and Exploitation (display and product generation) sub-system (PC2 and PC3), Synergie software is installed on this sub-system.
 - **Stations at Training Centres:** 12 processing and visualization PCs per training center. Both the eStation and Synergie software suites are installed on these PCs.
 - 1 Uninterruptible Power Supply (UPS) also known as a battery back-up, providing emergency power and line regulation as well to connected equipment by supplying power from a separate source when utility power is not available. A UPS, however, can be used to provide uninterrupted power to equipment, typically for 5–15 minutes until an auxiliary power supply can be turned on, utility power restored, or equipment safely shut down.
 - One 8 ports Network switch for Local Area Networking.
 - Power cords and RJ45 cables.

Table 1: Number of ground station located in each country (Grey rows: Stations with 3.7 meters diameter antenna / White rows: Stations with 2.4 meters diameter antenna)

For the reference of the stations mentioned above, see also the table 5 and 6 in Annex 2

Objectives

The purpose of this project is to contract an experienced service provider to provide maintenance of the existing stations (MESA, PUMA-2015, Training centres stations) deployed and/or upgraded during the MESA Programme (2013-2017) - (see location of the stations in the table 1 above). The contractor will provide services that cover the maintenance or refurbishment of the stations in order for them to be fully functional (i.e. it means that (i) EUMETCast flows is received on PC1 and transferred to PC2 and PC3 and (ii) Services are running on PC2 and PC3 (i.e. latest version of the eStation for MESA stations / the Synergie software for PUMA-2015 stations is processing the data received automatically)).

Contractor's tasks

The contractor will be responsible for the execution of the following tasks:

- Distance support;
- Intervention on site.

OFF-SITE INTERVENTION - DISTANCE SUPPORT

- Identify status and issue(s) of the stations based on the Proposed actions for maintenance table (Annex 1) and contacts (email, phone, etc.) with Station managers and/or Focal points;
- In coordination with G&A PMU and EUMETSAT User Helpdesk, complement and continuously update the Proposed actions for maintenance table (See the link in **Error! Reference source not found.**-Annex 1) or equivalent and identify the type and plan interventions off-site and on-site (cf. section 3.2) in collaboration with Station managers and Station focal points. This table should be submitted to AUC/HRST/G&A PMU and to EUMETSAT User Helpdesk⁸ on a monthly basis ;
- Repair and debug stations at distance when possible.

ON-SITE INTERVENTION

The contractor will be in charge to debug, repair, replace defective material, and/or update the SW of the ground stations.

Four (4) types of intervention are foreseen:

- Basic intervention (section 3.2.1);
- Outdoor intervention (section 3.2.2);
- Indoor intervention (section 3.2.3);
- Advanced intervention (section 3.2.4).

⁸ EUMETSAT User Helpdesk is the first point of contact for all maintenance support. This Helpdesk registers and processes enquiry provides a first level of intervention when possible (e.g. gives information linked with the status of the meteorological satellite or EUMETCast service), and forward to the technical authority of the Contractor when secondary support is required – See also the Annex 4: third parties interaction for more information about the current parties engaged in the Maintenance.

It is foreseen that all the stations that need on-site intervention will be visited once (at least with a basic intervention) and some of the stations will be visited twice, when necessary. The AUC required priority order is as follow (see also the table 6 Annex 2): The highest priority is given to the stations within the Consortia members (36). Then, outside the Consortia members, the priority will be given to the stations in the Countries where the services will be implemented (120) i.e. the countries of the Consortia members. The remaining ones (32) will be the last.

The bidders are informed that there are CFIs under this contract (please refer to **Error! Reference source not found.** - Annex 3).

When necessary, additional spare parts should be procured and delivered to the Stations by the Contractor.

Basic intervention

Under this type of intervention, the contractor will, if necessary, carry out light maintenance actions to prevent foreseeable problems and ensure good reception. Therefore, the contractor will be responsible for the execution of the following tasks:

- Check the status of outdoor and indoor equipment;
- Check the status of data reception and exploitation, software suite version;

Update, the Station software to the latest version, eStation software suite, Synergie, etc. This task should be performed with an appropriate methodology (i.e (i) Check the ISO version installed on all the PCs, (ii) Perform scratch installation from latest ISO image if not done yet and (iii) If the latest ISO is installed then check if there are rpms to update the PUMA/MESA 2015 station software to the latest version via PC3 upgrade process) ;

- Antenna repointing, when necessary;
- Light hardware intervention such as indoor/outdoor equipment cleaning;
- Assess the level of training of the station manager and the needs for additional training on station maintenance, if needed;
- More specifically, regarding the UPS, the contractor will analyse its operational status and will provide recommendations to the Stations' beneficiaries, when necessary.
- Elaborate a summary report based on template that will be provided by the beginning of the contract that will include at a minimum the HW/SW status of the station before and after the intervention, action(s) undertaken by the Contractor and recommendations. The intervention report(s) should be submitted to AUC/HRST/G&A PMU and to EUMETSAT User Helpdesk on a per intervention/ monthly basis.
- The performer of the intervention will provide basic information on the Stations functioning and be able to answer questions on the system architecture and functioning and indicate additional ways for gathering information and support (documentation, Helpdesk, ...).
