PIDA PAP Status Conclusions and Way Forward

- ❑ PIDA's implementation success lies in assurances that it will be financed. It is therefore urgent to extend the financing platform to include private investments for project sponsors to meet projects funding needs. This will entail putting in place conducive investment climate and developing strong financial markets at national level.
- ❑ There is need to expedite the design of a common framework to enhance private sector financing of trans-boundary infrastructure projects in Africa which will develop and harmonize policies, laws and regulations pertaining to private sector investment in trans-boundary infrastructure projects and also put in place an appropriate PPP Policy across all countries;
- ❑ Efforts for the setting up and operationalization of the PIDA technical assistance facility to address capacity issues in RECs , Power Pools, Corridors and Member States and should be pursued and concluded in NEPAD Agency. Member states must ensure that skills are developed in project preparation, PPP etc at National level by including the subjects in the curriculum for the relevant infrastructure and business courses at tertiary level.
- ❑ There is need to development strong and effective Project Implementation and Monitoring and Evaluation Frameworks and for the development of trans-boundary infrastructure projects throughout the project cycle.
